

Multi Year Accessibility Plan

Part 1: Introduction and Background Information

LAKERIDGE RESORT LIMITED is a Canadian four-season destination, delivering recreation, and event-based services to the public. Our 400+ employees provide experiential services to a diverse demographic, the local community, and patrons from all around the world.

Lakeridge Resort Limited Commitment to an Inclusive and Accessible Work Environment

LAKERIDGE RESORT LIMITED is committed to excellence in treating customers and employees in a way that allows them to maintain their dignity and independence. Believing in integration and equal opportunity, LAKERIDGE RESORT LIMITED is committed to creating an inclusive culture across the organization by preventing and removing barriers for persons with disabilities and meeting the requirements under the Integrated Accessibility Standard Regulation (IASR) of the Accessibility for Ontarians with Disabilities Act (AODA).

Lakeridge Resort Limited Commitment to Accommodation

LAKERIDGE RESORT LIMITED is committed to making every reasonable effort to accommodate people with disabilities. Where it is not possible to remove barriers, LAKERIDGE RESORT LIMITED will make efforts to accommodate persons with disabilities in a timely, effective and suitable manner, provided such accommodation does not cause LAKERIDGE RESORT LIMITED undue hardship.

Business Case for Accessibility

The AODA became law in June 2005, with the goal to ensure that all Ontarians with disabilities have full access to goods, services, facilities, accommodation, employment, building structures, and premises by January 1, 2025. It applies to every public organization and to private organizations in Ontario that have at least one employee, and builds on progress made under earlier legislation known as the Ontarians with Disabilities Act, 2001 (or the ODA).

More than 15% of Ontarians have a disability – that’s 1.85 million people, or 1 in 7 people. The number of Ontarians with a disability will increase as our demographics evolve to include ageing populations; this market will continue to grow and drive society to meet their demands

and needs as people look for accessible products and services for themselves and their families, both in their own communities and when travelling with others. People with disabilities have a discretionary spending power of \$25 billion in the Canadian economy, and if accessibility has a modest impact of 3% increase in tourism, this would be \$700M in additional tourism spending.

Social responsibility is fast becoming a differentiator for business; it is part of a company's employment brand and customer brand. LAKERIDGE RESORT LIMITED is committed to preventing and removing barriers to our services and workplaces and although inclusivity and accessibility are law, we realize this makes sound business and economic sense. An accessible LAKERIDGE RESORT LIMITED allows us to deliver the highest standard of products and services to our customers and retain diverse and talented employees—both of which set Lakeridge Resort Limited competitive advantage as the destination and employer of choice.

Part 2: Accessibility at LAKERIDGE RESORT LIMITED

Accessibility Plan

The AODA seeks to provide a fully accessible Ontario by 2025. Consistent with this objective, there are many obligations placed on organizations, including LAKERIDGE RESORT LIMITED, to ensure workplaces and services are fully accessible to the public and employees, including persons with disabilities.

The Integrated Accessibility Standard Regulation (IASR) requires every employer with 50 or more employees, to develop and post a Multi-Year Accessibility Plan on their website by January 1, 2014. In accordance with the IASR, LAKERIDGE RESORT LIMITED's Multi-Year Accessibility Plan outlines LAKERIDGE RESORT LIMITED's strategies to prevent and remove barriers to accessibility wherever possible.

The objective of the Multi-Year Accessibility Plan is to support LAKERIDGE RESORT LIMITED's compliance with the AODA and the IASR and continue to drive LAKERIDGE RESORT LIMITED's commitment to treating all people in a way that allows them to maintain their dignity and independence. We believe in integration and equal opportunity.

Barrier Assessment

In accordance with the AODA and with LAKERIDGE RESORT LIMITED's commitment to treating all people in a way that allows them to maintain their dignity and independence while creating memorable experiences for customers and an inclusive work environment for LAKERIDGE RESORT LIMITED's employees, our plan seeks to prevent and remove barriers to accessibility for persons with disabilities.

A 'barrier' is anything that prevents a person with a disability from fully participating in one or more aspects of society because of his or her disability. Typical barriers to accessibility include architectural/physical, attitudinal, informational/communication, organizational/systemic, or technological barrier.

Barrier Definitions

1. **Architectural/Physical:** elements of buildings or outdoor spaces that create barriers to persons with disabilities. These barriers relate to elements such as the design of a building's stairs or doorways, the layout of rooms, or the width of halls and sidewalks.
2. **Attitudinal:** behaviours, perceptions, and assumptions that discriminate against persons with disabilities. These barriers often emerge from a lack of understanding, which can lead people to ignore, to judge, or have misconceptions about a person with a disability
3. **Informational/Communication:** occur when sensory disabilities, such as hearing, seeing, or learning disabilities, have not been considered. These barriers relate to both the sending and receiving of information.

Part 2: Accessibility at LAKERIDGE RESORT LIMITED CONTINUED

4. **Organizational/Systemic:** policies, procedures, or practices that unfairly discriminate and can prevent individuals from participating fully in a situation. Organizational or systemic barriers are often put into place unintentionally.
5. **Technological:** occur when a device or technological platform is not accessible to its intended audience and cannot be used with an assistive device. Technology can enhance the user experience, but it can also create unintentional barriers for some users. Technology barriers are often related to information and communications barriers.
